Order Ref:

Standard:

G100-M-DN-X

Stainless Steel trim:

G100-SS-DN-X

DN = Size in mm

X = Spring Range (see Chart Over)

GRESSWELL G100 HIGH LIFT SAFETY VALVES

Side Outlet discharge with test lever. These valves are used with compressible media, mainly steam systems to prevent safe pressures being exceeded.

SIZE RANGE

mm	15	20	25	32	40	50
ins	1/2	3/4	1	1 1/4	1 1/2	2

PIPE CONNECTIONS

Male Inlet x Female Outlet.

Standard valves are threaded BS 21:1985 Rp Parallel. Alternative thread standards, i.e. taper or NPT are available upon request.

Flanged connections also available. Most flange standards can be accommodated, e.g. ANSI, BS4504 - please specify requirements.

FEATURES & BENEFITS

Gresswell Valves are quality assurance approved to BS EN ISO 9001: 2000. Certificate No. 0910407.

Full Cat IV PED approval.

The G100 range of valves are ideal for handling compressible material but it must be noted... **they are not suitable for liquids.**

Clear operating and maintenance instructions are supplied with each despatch.

Generally in accordance with BS6759 Parts 1 & 2.

See leaflet Ref: DC G100 for Discharge Capacities.

TESTING

All Gresswell Relief Valves are given a hydraulic seat tightness test before leaving the factory and the adjustment range is clearly marked.

All valves are supplied pre-set.

Flanged valves are pressure tested to ensure soundness of joints.

Special tests or witness testing can be arranged at extra cost.
